Course: 1 BSInfoSys-A

## Challenge #4: Implementation of Favicon

The screenshot shows the Visual Studio Code editor with two files open: `index.html` and `stylesheet.css`. The `index.html` file is selected, and its content is visible. The code includes a DOCTYPE declaration, an `html` tag with `lang="en"`, a `head` section with a `title` and two `link` tags (one for an icon and one for the stylesheet), and a `body` section with a `header` and a `nav` bar. The `link` tag for the icon is highlighted in blue.

```
1 <!DOCTYPE html>
2 <html lang="en">
3   <head>
4     <title>Kaye</title>
5     <link rel="icon" type="image/x-icon" href="images/k.png">
6     <link rel="stylesheet" href="stylesheet.css">
7   </head>
8   <body>
9     <header class="header">
10      <a href="#" class="logo">Portfolio</a>
11      <nav class="navbar">
12        <a href="#home">Home</a>
13        <a href="#about">About</a>
14        <a href="#services">Services</a>
15        <a href="#skills">Skills</a>
16        <a href="#contact">Contact</a>
```
